

Vortex Air Conditioning Optimizers™

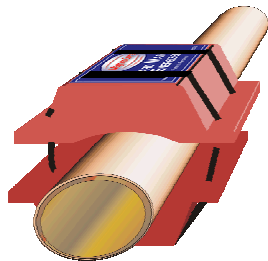

Cool Off with Lower Costs

Save Electrical Costs with Vortex Air Conditioning Optimizers. The Vortex Optimizer increases the efficiency of the cooling which saves electricity. Users report having to turn up thermostats as the air is much colder as the house cools much faster thereby turning the system off sooner saving a reported average of 15%.

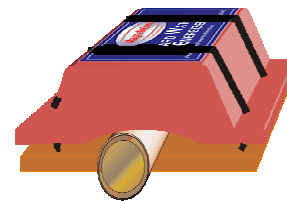

Vortex Heat Pump Optimizers save 15% on heating and cooling.

Clamp-on double unit on large line going into the compressor

Clamp-on Unit and back plate on small copper line going into air handler

Simply Clamp-on Permanent Savings
